The seminar was attended by 62 students out of which 21 were female.

Speaker Session on the topic "Applied Primary Research" by Ms. Nidhi Arora.

Nidhi Arora, an IIM Calcutta alumna, is the founder of Esha, an organization dedicated to independent research in sensitization and special abilities. Additionally, she serves as a Director at Topgain Consulting, a niche firm collaborating with Indian promoter-led organizations.

Exploring applied primary research offers valuable insights, while recognizing the pivotal role of good data is crucial for making well-informed decisions. Both aspects contribute significantly to informed decision-making processes.

The seminar touched on the role 'good' data plays whilst making informed decisions in different sectors, be it corporate or non-governmental. It engaged both the students and professors in pondering over various questions such as "What is a marketable need?", "How to narrow down to the target demographic?", even asking impromptu questions on what a GOOD startup idea would be, keeping Delhi University students as the target audience.

Being the founder of ESHA, an organization focusing on research on sensitization, Ms. Nidhi Arora also showed survey responses to questions on accommodating visually impaired people in the corporate sphere. The case studies and presentations were not only illuminating but also left the attendees with a renewed sense of how poignant primary research is.

Feedback:

"A very enlightening and interactive seminar!" "Would love more sessions like these"

The speaker's session on applied primary research was insightful, providing a practical approach to research methodologies. The examples shared effectively

demonstrated real-world applications, enhancing understanding of how to implement these strategies. Clear communication and engaging delivery made the complex topic accessible. Overall, a valuable learning experience.
