

Report of E-Waste Management Committee

Session 2023-24

The E-Waste Management Committee has undertaken a proactive initiative to raise awareness about the proper disposal and reduction of electronic waste (e-waste) through its college's social media handles, particularly on platforms like Twitter and Instagram. With the increasing proliferation of electronic devices, the responsible management of e-waste has become crucial for environmental sustainability and human health. The committee recognizes the importance of educating the college community and beyond about the significance of proper e-waste disposal and strategies to minimize its generation.

The primary objectives of the awareness campaign are to:

- Educate the college community about the environmental and health hazards associated with improper e-waste disposal.
- Promote responsible behaviors such as recycling, refurbishing, and donating electronic devices to extend their lifespan.
- Encourage adoption of sustainable practices to reduce e-waste generation, including purchasing durable products and opting for repair over replacement.
- Raise awareness about the availability of e-waste recycling facilities and proper disposal methods in the local area.

To achieve these objectives, the E-Waste Management Committee has employed various strategies:

- Creation and dissemination of informative posters containing essential information on e-waste management, including tips for proper disposal and reduction of e-waste.
- Regular updates and posts on the college's Twitter and Instagram handles, featuring engaging content such as infographics, statistics, and practical tips.

Sub: Request for Permission to organize an event for e-waste awareness as Social Media Campaign

Respected Sir,

This is to inform you that the E-Waste Management Committee is planning to organize an event for spreading awareness about the E-waste handling through social media campaign. The committee is planning to float messages/ posters on the college social media handles – Facebook, Twitter and Instagram on weekly basis. You are requested to sanction an estimated budget of Rs. 5000/- to organize the event for Student certificates/ Printing/ refreshments/ Poster and other miscellaneous expenses. The event coordinators for the above are Prof. Neeraj Kumar Sharma, Ms. Sakshi Taresh Khanna and Ms. Pooja Yadav.

Kindly give us permission to organize the event and use the social media handles for the purpose of posting information.

Thanking you,

Yours Sincerely,

(Dr. Neeraj Kumar Sharma)
Convener, E-Waste Management Committee

SOLVING E-WASTE

From cutting edge technology, to a useless piece of tin, your favorite gadgets are gradually becoming a burden to the environment.

WHAT?
E-Waste is simply any discarded electronics or electronic equipment. They contain metals and plastics that can be recycled, but end up polluting the Planet. It includes working and broken items that are thrown in the garbage or donated to a charity, from laptops & home appliances, to heavy industrial and medical equipment.

The STATUS QUO
Currently, of the **50 million tonnes** of e-Waste produced annually, only about **20% gets recycled**, the rest ending up contributing to polluting the earth. Here are a few ideas for tackling this problem, before it gets too late, indeed, no one wants to be like **WALL-E**.

OUR Responsibility
Used electronics have a lot of **inherent value that we don't realize**. The vast majority of electronics should be recycled, and the items within them that will be recovered include plastic, steel, aluminum, copper, gold, silver, and other precious metals.

ALSO Our Responsibility
We must push governments to form stringent legislations to control and monitor e-Waste produced in their country. Most importantly, awareness has to be spread and a people need to be educated about these simple ideas that can be inculcated in daily life, which albeit have a huge impact on saving the planet.

Some Facts to keep you up at Night :-)

- Microplastics disseminating from e-Waste have found their way into Fish lungs, and subsequently human diet.
- Wastelands are irreversibly depleting the environment and its biodiversity.
- Incessant mining for metals will soon deplete the Earth of its natural minerals, meaning no more Gold Jewellery and Diamond rings.

Subject: **Submission of Annual Report regarding disposal/management
of E-Waste for the year 2023-24**

Dear Sir/ Madam,

This is in response to your letter received dated 23rd July 2023 (F.No. DPCC/WMC-III/E-Waste/8948) regarding the submission of annual return under the E-Waste (Management) rules, 2022 for the year 2023-2024. We are hereby submitting the report as under:

The E-waste committee collected e-waste from various departments, office and library of the college for proper disposal as per rules on 21st March 2023 was stored in the Central storage room of the college. The committee is still in the process of collecting e-waste from departments, office etc. of the college. The details of the e-waste items already collected are mentioned in the Form 3 attached along with this letter.

Thanking you,

Yours Sincerely,

(Prof. Rakesh Kumar Gupta)
