

# Report of E-Waste Management Committee

## Session 2022-23

The E-Waste Committee has been actively engaged in raising awareness and promoting responsible disposal of electronic waste throughout the 2022-23 session. This report outlines the key activities conducted, including an e-waste collection drive, a poster-making competition, the appointment of e-waste ambassadors, and the submission of our annual report to the Delhi Pollution Control Board.

In early 2022, the committee selected a group of dedicated individuals as E-Waste Ambassadors. These ambassadors played a crucial role in advocating for e-waste management practices and helped in organizing and promoting the events throughout the session. Their commitment significantly contributed to the success of our initiatives.

The committee organized a comprehensive e-waste collection drive aimed at collecting discarded electronic devices from the community. The drive was set up at the central lawn from September 26, 2022 – September 30, 2022 to maximize participation and ensure convenient drop-off points. The collection drive was highly successful, with a substantial amount of e-waste gathered. The drive not only facilitated the campaign for spreading awareness about the safe disposal of electronic waste and importance of e-waste recycling among participants.

A poster-making competition was held on 8<sup>th</sup> September 2022 to engage students and the community in creative advocacy for e-waste management. Participants were encouraged to create informative and impactful posters that highlighted the significance of responsible e-waste disposal. The competition received a robust response, with numerous entries submitted online and offline. The winning posters were displayed at key locations to further promote e-waste awareness. The competition provided an excellent platform for participants to express their creativity while contributing to the cause.

The committee prepared and submitted its annual report to the Delhi Pollution Control Board. The report detailed the activities conducted, achievements, challenges faced, and future plans for e-waste management. It also included data from the collection drive and feedback from the community.
